

Box plot showing the distribution of 'cost' for three different values of α (0.1, 0.05, 0.01). The x-axis is labeled 'cost' with values 4, 8, 16. The y-axis labels correspond to the α values. The plot shows that as α decreases, the median cost increases and the distribution becomes more spread out.

α	Min	Q1	Median	Q3	Max	Outliers
0.1	4	4	4	4	4	None
0.05	4	6	7	8	10	None
0.01	4	10	12	14	18	16, 20
